

Phaseolus Vulgaris, the Great Northern White Bean, contains an inhibitor of alpha-amylase. Alpha-amylase is an enzyme that promotes the breakdown of starch in the human intestinal tract. Ingestion of this inhibitor, which is present in the protein fraction of the bean, can reduce the digestion of starch in foods so that less sugars are absorbed. This "starch-blocker" action reduces the available caloric content of some foods.\*

- Helps carb control\*
- Supports weight loss\*
- Supports fat metabolism\*

**SUGGESTED USE:** As a dietary supplement, take three (3) capsules before any meal containing complex carbohydrates or starches, or as directed by your qualified healthcare professional.

**Keep out of the reach of children.**

**Do not use if safety seal is broken or missing.**

**Keep in cool, dry place.**
