

Fucoxanthin is a carotenoid (like lutein and lycopene), a powerful antioxidant that protects cells from free-radical damage. It is found in several different type of marine vegetable (edible seaweed), long considered among the most nutritious vegetation on Earth. Recent research suggest that natural compounds in marine vegetables can significantly affect fat metabolism and that fucoxanthin is one of the key ingredients.*

- › Supports healthy glucose level*
- › Supports healthy metabolism*
- › Supports fat burning & weight loss*
