

Directions: Take one to two tablespoons in juice or water daily. As a soothing tea, add two tablespoons to a cup of hot water.

Essence of Wild Sage is made with only deep underground source springwaters that reside in the mineral- and nutrient-rich rock and soil. These liquids are quickly activated in the body because of the important oxygenated compounds, which are the result of a special process using only steam-extracted, wild, mountain- grown sage. Take Essence of Wild Sage to support a healthy whole body response, including a healthy hormonal, immune and neurological response.*
