

Kelp is a large, leafy seaweed belonging to the brown algae family that grows in "forests" in the colder waters of the world's oceans. Kelp has been used for centuries as an important nutritious staple ingredient in Chinese, Japanese, and Korean cuisines. It is good source of marine minerals, including potassium, magnesium, calcium and iron. Certain research publications indicate that Kelp may help support the following:

- Supports optimal iodine level*
- Supports healthy thyroid function*

SUGGESTED USE: As a dietary supplement, take one (1) tablet daily, preferably with a meal.

Keep out of the reach of children.

Do not use if safety seal is broken or missing.

Keep in cool, dry place.
