

Citrulline is a non-essential amino acid that is an important intermediate in the urea cycle, functioning along with Arginine and Ornithine to rid the body of ammonia, a byproduct of protein metabolism. Because Citrulline is a precursor of Arginine, it provides a readily available source of material for Arginine production, thereby helping the body maintain healthy Arginine levels. Citrulline also plays an important role in the healing process and in the maintenance of a healthy immune system. Certain research publications indicate that L-Citrulline may help support the following:

- Supports nitric oxide production*
- Supports liver detoxification*
- Supports cardiovascular & neurological health*

SUGGESTED USE: As a dietary supplement, take 1/4 - 1/2 level teaspoon 1 to 3 times daily between meals.

Keep out of the reach of children.

Do not use if safety seal is broken or missing.

Keep in cool, dry place.
