

L-Leucine is one of the three Branched Chain Amino Acids (BCAAs) that is critical in muscle tissue structure. Among the BCAAs, Leucine is unique in its role as a signaling molecule that helps to regulate optimal skeletal muscle protein synthesis in normal tissues. Studies suggest that L-Leucine, in conjunction with adequate dietary protein, may help to build and maintain lean tissue and optimize body composition.* Certain research publications indicate that L-Leucine may help support the following:

- Supports healthy glucose metabolism*
- Supports protein synthesis*

SUGGESTED USE: As a dietary supplement, mix 1 level tablespoon into 8 oz. of water or other beverage 1 to 3 times daily.

Keep out of the reach of children.

Do not use if safety seal is broken or missing.

Keep in cool, dry place.
