

L-Proline is an amino acid that is essential for the synthesis of collagen, the most abundant protein in mammals. Collagen is the main structural protein that constitutes all human connective tissues, including skin, tendons, ligaments, joints, bone, and vasculature (veins and arteries). L-Proline therefore provides building blocks that help to stabilize and strengthen the structural components of the body.* Certain research publications indicate that L-Proline may help support the following:

- Supports healthy joints*
- Supports musculoskeletal health*

SUGGESTED USE: As a dietary supplement, take two (2) capsules one to two times daily, preferably on an empty stomach.

Keep out of the reach of children.
Do not use if safety seal is broken or missing.
Keep in cool, dry place.
