Directions: Take one or more gelcaps daily with meals or juice.

Oreganol P73 is the original and truly wild oregano leaf extract, a blend of 4 edible species of high mountain oregano. Our wild oregano is from the original ancient sources grown upon the white, calcium-rich rock found in the pristine Mediterranean mountains, up to 8,000 feet above sea level. Accept no cheap imitations grown merely in dirt, as are farm-raised and GMO varieties. Our wild oregano is from ancient, unglaciated sources, so the rocky soil is exceptionally rich. Stay powerful with the potency of wild Oreganol P73.
