

PABA, or para-aminobenzoic acid, is generally classified with the B-vitamin family, although it is not itself a vitamin. Its best known role is as a precursor for folic acid production. Folic acid is important in cell division and the healthy development and structure of red blood cells. PABA is also involved in many important processes in the body.*

- ▶ Supports utilization of Pantothenic Acid*
- ▶ Supports healthy skin & hair pigments*
- ▶ Supports formation of red blood cells*

SUGGESTED USE: As a dietary supplement, take one (1) tablet daily, preferably with meals.

Keep out of the reach of children.

Do not use if safety seal is broken or missing.

Keep in cool, dry place.
