

Calcium Pyruvate is a stable salt form of Pyruvic Acid, which is key metabolite of carbohydrate metabolism that is needed to begin the citric acid cycle, the process by which cell produce energy in the form of ATP. As the main chemical fuel of the body, ATP powers most vital functions throughout the body, including muscular movement. Calcium pyruvate is also important in number of other metabolic pathways, including those that results in fat and protein metabolism, as well as glycogen storage.† Certain research publications indicate that Calcium Pyruvate may help support the following:

- Supports healthy weight loss.†
- Supports bone and nerve health.†
- Supports energy production.†

SUGGESTED USE: As a dietary supplement, take ½ teaspoon one to three times daily, or as directed by your qualified healthcare professional.

Keep out of the reach of children.

Do not use if safety seal is Broken or missing.

Keep in cool, dry place.
