HighT[®]

WEEKEND WARRIOR

In a man's brain, there is a complex chain of signals called the hypothalamic-pituitary- gonadal axis. The Testosterone produced in the testes is regulated by this chain. At the onset of puberty, there is a rapid increase in the production of Testosterone. But just as rapidly as it increases at puberty, Testosterone production begins to slow from the age of 30 onward. HighT[®] has been scientifically formulated to help Testosterone levels, to increase sexual libido, muscle mass and energy levels.***

- ✓ Change your lifestyle habits
- ✓ Use resistance exercise
- ✓ Eat healthy

Commit to getting off the couch, be the king of weekend warriors, build your passion to improve! 'Boost What Matters'™

WORK HARD, PLAY HARD, RECOVER FASTER.™
