

MSM (Methylsulphonylmethane) is a natural form of organic sulfur found major structural tissue of the body such as cartilage. This natural compound, researched since 1979, provides the chemical links needed to form and maintain numerous different types of tissues found in the human body, including connective tissue such as articular cartilage. While MSM is a natural component of almost all fresh fruits, vegetables, seafood and meat, food - processing methods reduce sulfur levels, making supplementation more important than ever.† Certain research publications indicate that MSM may help support the following:

- Supports healthy connective tissue.†
- Supports organ and joint function.†
- Supports healthy skin, hair and nail by producing keratin.†

SUGGESTED USE: As a dietary supplement, take two (2) tablets one to two times with meals, or as directed by your qualified healthcare professional. If intestinal gas occurs, reduce dosage.

Keep out of the reach of children.

Do not use if safety seal is broken or missing.

Keep in cool, dry place.
