Increase Testosterone & Training Performance

²Six Star® Testosterone Booster is also scientifically engineered with a unique, plant-based blend shown in a 7-week human clinical study to help maintain peak testosterone to cortisol ratio after an intense training regimen. Cortisol is a hormone released due to stress that can break down muscle tissue. Test subjects also enhanced performance as determined by a marker of training capacity.[▲]

FOR BEST RESULTS, STACK WITH:

1 Take 30 to 45 minutes before workout
Pre-workout powder engineered to enhance muscle performance. Increase energy and get you pumped while you train.[▲]

2 Pre- & post-workout between meals
