Ascorbic Acid is another name for Vitamin C. Vitamin C is a popular antioxidant that is responsible for at least 300 metabolic functions in the body. Because the human body cannot produce Vitamin C, it must be obtained through the diet or by supplementation. Vitamin C is a water-soluble vitamin and excessive Vitamin C is not stored in the body; for this reason, Vitamin C levels must be continually replenished via diet or supplementation.* Ascorbic acid is a bioavailable form of Vitamin C in a powder form. Certain research publications indicate that Vitamin C may help support the following:

- Supports immune & eye health*
- Supports circulatory & heart health*
- Supports healthy aging & prenatal health*
- Supports muscle, blood vessels, bones & cartilage*

CAUTION: For adults only, if you are pregnant, nursing, taking any medications or have any medical condition, consult your doctor before use. Discontinue use and consult your doctor if any adverse reactions occur.

Keep out of the reach of children.

Do not use if safety seal is broken or missing.

Keep in cool, dry place.
