

SUGGESTED USE: As a dietary supplement, take 2 capsules 30 minutes prior to workout and 2 capsules after workout.

KRE-ALKALYN® EFX...IT'S BUFFERED. IT'S STABLE.

Kre-Alkalyn® EFX represents a major breakthrough in performance supplementation thanks to its multi-patented, pH-Correct creatine* stabilization technology. Our Scientist Dr. Jeff Golini (pictured) discovered that "buffering" to pH-12 produced a stable creatine monohydrate molecule.*

PH-CORRECT MAKES IT A CATEGORY OF ONE!

Kre-Alkalyn® EFX is the only creatine monohydrate product with a pH of 12 because its molecules are synthesized with "buffering" agents using a patented (#6,399,661) manufacturing process to make it pH-Correct.*

GRAPH: Creatine stability is negatively influenced by acids and liquids at pH 6.9 or less. Kre-Alkalyn® (#6,399,661) is the only creatine with patent- protection from pH 7 to pH 14.**
