

Pro Performance® RapidDrive Glutamine 5000™ features our most advanced RapidDrive™ Amino Acid Technology. Superior to regular glutamine, this potent glutamine formula has been pulverized, or "micronized," from large molecules into smaller particles that are easier to absorb and deliver fast fuel for powerful performance.* Maximize anti-catabolic responses through the technology of the RapidDrive™ System and fuel muscles as you strive to achieve new performance levels.

Using Pro Performance® RapidDrive Glutamine 5000™ can help rapidly replenish glutamine stores. Each serving supplies 5000 mg of pure glutamine and mixes easily in any beverage or sports drink.

Glutamine, one of the most abundant amino acids found in skeletal muscles, hydrates muscle cells, provides an anti-catabolic effect, and is involved in protein synthesis.* Prolonged high-intensity exercise has shown to decrease glutamine levels, which may result in glutamine deficiency.
