

A standardized cultured extract of Japanese medicinal mushroom mycelia (roots), **AHCC®** is one of the world's most researched specialty immune supplements, supported by over 30 human clinical studies. Research on AHCC has been conducted at some of the top academic institutions and clinics in the US and worldwide.

AHCC has been shown to:

- Maintain optimal white blood cell activity*
- Promote optimal T cell activity*
- Promote optimal macrophage activity*
- Increase activity & number of dendritic cells*

Unlike most other mushroom extracts, which contain beta-glucans, AHCC is rich in acylated alpha-glucans and other unique fractions, produced using a patented culturing process. Due to its superior supporting clinical research, AHCC is used by hundreds of clinics worldwide.
