HERE AT NATURAL FORCE. WE HELP PEOPLE LIVE HAPPIER, HEALTHIER LIVES, WHILE MINIMIZING OUR IMPACT ON THE

## A healthy metabolism starts with clean protein.

We believe that adequate daily protein can be essential for regulating appetite, maintaining a healthy weight, and supporting lean muscle.\*

This is why we start with milk from heritage breed Jersey cows, pasture- raised exclusively on U.S. family farms. Then, we gently process the whey to retain high levels of clean protein perfect for your everyday needs.\*

## How to get started:

This clean protein contains no fillers or mixing agents and is not designed to be stirred with a spoon. For best results, use a blender or shaker cup. SMOOTHIES: Pour 12oz cold liquid into your blender. Add I level scoop with I cup frozen greens, ½ cup frozen fruit, and I tbsp quality fat such as MCT oil. Blend until smooth. SHAKES: Pour 12oz cold liquid into your shaker cup. Add 1 level scoop and shake vigorously. BAKED GOODS: Add 1 level scoop to your favorite pancake, waffle, or baking mix.

This is what organic grass-fed looks like.
