

Rapid Dissolving

NutriBiotic® Meta-C® is a unique, buffered vitamin C with biologically active metabolites from spirulina, a single-celled, blue-green algae rich in nutrients. Meta-C Tablets are rapid dissolving and absorb fast and efficiently.

Meta-C is produced by water-processing vitamin C and calcium with an array of biologically active metabolites at low temperatures. This creates a fully reacted calcium ascorbate, which is then combined with spirulina to form an advanced food-bound nutrient system providing all the properties found in concentrated whole foods such as protein, lipids, glycoproteins, lipoproteins, nucleoproteins (RNA/DNA), complex carbohydrates, phytopigments, flavonoids, fatty acids, enzymes, co-enzymes, trace elements, and fiber.

Vitamin C and calcium are essential nutrients that provide antioxidant protection to the immune system as well as maintain the health of blood vessels, tissue, cartilage, bones, eyes, and other organ

systems.* Vitamin C is also required for the biosynthesis of collagen, L-carnitine, and neurotransmitters.* The combined positive effects of vitamin C, calcium, and spirulina make Meta-C Tablets an excellent choice for supporting the body's overall health.

Meta-C Tablets are easy-to-swallow or may be crushed and put into food or beverages if desired.

Suggested Use: As a dietary supplement, take one tablet daily with or without meals.
