** Results from an independent test using DMAC/A2 method to compare soluble PAC content across various cranberry pills.

Cranberry PACs

by SZIO+

Maintain a healthy urinary tract, naturally.*

Cranberries have active molecules called proanthocyanidins (PACs) that can help support a healthy urinary tract.* Most cranberry supplements provide less than 1% PACs whereas each Utiva Cranberry PACs capsule contains 36 mg of soluble PACs measured by DMAC/A2. This high concentration of PACs helps promote natural flushing of the bladder.* We've taken the hard stuff — the science — and boiled it down to one simple pill.

Thanks to soluble PACs, we have a kinder way to maintain a healthy urinary tract once and for all.*
