TAURINE 600

Supports Healthy Blood Pressure,
Heart, Liver, Eye and Ear Health

Dietary Supplement | **360** Easy-to-Swallow Capsules

Andrew Lessman's TAURINE 600 is a pure, high potency source of the amino acid **Taurine**, which is best described as the most important amino acid you likely have never heard of. **Taurine** is found in all body tissues and there is virtually no organ or system that is not positively impacted by its presence. **Taurine** is most highly concentrated in critical tissues of the heart, blood cells, muscles, brain, liver, ear and retina of the eye. **Taurine** provides protective, stabilizing benefits to cell membranes throughout the body supporting the management and movement of essential ions, such as Calcium, Magnesium, Sodium and Potassium. **Taurine** supports heart and cardiovascular health through numerous mechanisms, including its positive influence on healthy blood pressure and vascular function. **Taurine** also provides protective benefits to the hard-working tissues of the liver. **Taurine** has been recognized for the protective benefits it provides to the retina of the eye and the delicate structures of the ear. Given its diverse benefits, it is not surprising that population studies have associated **Taurine** intake with healthy longevity. **Taurine's** best sources are meat and seafood; however, even a typical diet rich in those foods only provides low levels of **Taurine** making supplementation the best means of achieving its many benefits. **Taurine** may be the least known of amino acids, but that will likely not last long given its long list of unique and exceptional benefits.
