Reduced Glutathione Complex contains glutathione (GSH), a key element of the liver's detoxifying process, and also the precursor for glutathione peroxidase, a major free radical scavenging enzyme. Recent scientific research indicates that molybdenum, a trace mineral that activates the enzymes aldehyde oxidase and sulfite oxidase, may provide necessary nutritional support for chemically sensitive individuals. Coenzymated™ vitamin B-2 (riboflavin) is the precursor for FAD, a coenzyme that recycles used GSH.\*

Suitable for vegetarians. Contains no dairy, egg, gluten, soy or wheat. Contains no sugar, starch, salt, preservatives, or artificial color, flavor or fragrance.
