

ENZYME [EN-ZAHYM]:

VARIOUS PROTEINS CAPABLE OF PRODUCING CERTAIN CHEMICAL CHANGES IN ORGANIC SUBSTANCES BY CATALYTIC ACTION, SUCH AS DIGESTION.

You are what you absorb - not what you eat, and unfortunately the readily available processed foods we reach for when we're short on time are devoid of the naturally occurring digestive enzymes we need to properly assimilate our nutrients. 9-Zymes contains nine key enzymes to help break down the protein, carbs and fats we eat for easier digestion, improved nutrient absorption, and reduced abdominal bloating.*
