

Suggested Use: Take 1 scoop (3g) with or between meals. Enjoyed mixed in juice, smoothies or sprinkled on food.

Promotes Cellular Health, Detox & Immunity*

BioChlorella starts at the source of overall health - the cells. It kick-starts a comprehensive regeneration of cellular health, communication, and function through the unique properties of CGF (Chlorella Growth Factor) and dense nutritional content. The naturally-occurring phytonutrients promote detoxification of many harmful toxins and heavy metals that accelerate the deterioration of vital metabolic functions. The vast complex of nutrients within Chlorella are also shown to raise the immune system. BioChlorella also provides a plant-based and bioavailable form of Vitamin B12.

Purity & Quality Standards

BioChlorella is delivered in raw and broken cell wall form and is USDA Certified Organic. BioChlorella is cultivated in an environmentally pristine region of South India with plentiful sunlight, 100% purified-water, plant-based fertilizers, and meets the world's most rigid organic and vegan standards. Upon harvest, the chlorella is dried at low temperatures to preserve its natural nutrient levels and maximum CGF levels. In the final proprietary stage its cell walls are cracked-open using a conscientious process that ensures the highest levels of bioavailability and efficacy.
