Contracted Beekeeping

Our products are produced by "Contracted Beekeeping" to assure the highest quality and traceability from our hives to your table. Our products are also tested for their purity, biological activity and compliance with food safety standards.

Propolis

Propolis is a resin-like bee product that the bees collect from the leaves, stems and buds of the plants.

The main function of Propolis is to provide and maintain the antiseptic environment in the hive. Honey bees use Propolis for protecting larvae and themselves against microorganisms (viruses, bacteria, fungus), and they use it as a source of disinfectant in the hive. Antioxidant capacity of propolis is high due to its rich content of flavonoids and phenolic compounds.
