

Kyäni Sunset provides essential omega-3 fatty acids from pure wild Alaskan salmon (rich in EPA and DHA). Supportive but not conclusive research shows that consumption of EPA and DHA omega-3 fatty acids may reduce the risk of coronary heart disease. One serving of Sunset provides 500 mg of EPA and DHA omega-3 fatty acids. Also providing nature's most potent form of Vitamin E, tocotrienols, Sunset supports healthy function of the heart, brain, joints, and immune system, and helps support optimal cholesterol levels in healthy individuals.\*

Kyäni Sunset contains no beef or pork by-products. This product contains naturally occurring Astaxanthin.

Keep in a cool dry place, tightly closed and avoid excessive heat. Do not use if safety seal is damaged or missing. Consult a healthcare professional before use if pregnant or breastfeeding. Keep out of reach of children.
