VITAMIN  
Breastfed Infant

D-VI-SOL®

VITAMIN D FOR SUPPORTING  
STRONG BONES & TEETH\*

D-Vi-Sol (1 mL daily) has vitamin D as recommended by the AAP for all breastfed infants.

D-Vi-Sol has vitamin D that helps your baby's body absorb calcium for strong bones and teeth.\*

D-Vi-Sol complements your breast milk to help provide vitamin D your baby may still need.

Trust Enfamil® - "1 selling infant vitamin brand"

The American Academy of Pediatrics (AAP) recommends using 400 IU of a vitamin D supplement daily for exclusively and partially breastfed babies because of low average levels of vitamin D in breast milk.

DIRECTIONS FOR USE

Shake bottle well and fill dropper to 1 mL line (daily serving) unless doctor recommends another amount.

Dispense gently into mouth towards inner cheek; a small amount will remain in the tip.

To increase acceptance, mix with breast milk, formula, juice, cereal or other foods.
