10 Strain Probiotic Digestive Care Supplement

About probiotic bacteria

Intestinal microflora plays an important role in our lives and in the way our bodies function.* Beneficial bacteria found in our intestinal tract are essential to our bodies for supporting digestive and immune system health.* However, the number of beneficial bacteria in our intestines begins to decline as we age. Certain lifestyle factors such as stress and poor diet can also affect the balance of beneficial intestinal bacteria. Member's Mark® 10 Strain Probiotic can help replenish the beneficial bacteria our bodies need to perform vital body functions.*

What are Probiotics?

Probiotics are the "friendly" bacteria naturally found in your intestinal tract.* These beneficial bacteria help promote a healthy intestinal microflora, which is key to proper digestive system function.* Probiotics also play an important role in promoting a healthy immune system.*

The benefits of taking probiotic:

Probiotics support the development of healthy intestinal microflora.* Daily probiotic intake helps maintain our body's natural balance of good bacteria, promoting gastrointestinal and immune health.*

About our formula:

Member's Mark® 10 Strain Probiotic contains 10 billion active cultures** per capsule and 10 strains of beneficial bacteria: *Lactobacillus acidophilus*, *Bifidobacterium lactis* HN019™, *Lactobacillus rhamnosus* GG, *Bifidobacterium infantis*, *Bifidobacterium longum*, *Lactobacillus salivarius*, *Bifidobacterium bifidum*, *Lactobacillus plantarum*, *Lactobacillus paracasei* and *Bifidobacterium breve*.

This probiotic blend can help replenish healthy bacteria and support digestive and immune health.* Our formula contains a good balance of both *Bifidobacterium* and *Lactobacillus* which helps promote both large and small intestinal health.* We formulated Member's Mark® 10 Strain Probiotic with probiotic strains such as *Lactobacillus rhamnosus* GG and *Bifidobacterium lactis* HN019™, that are supported by science and clinical studies. For instance, a study on *Bifidobacterium lactis* HN019™ showed that it may help regulate colon transit time.* Just one capsule per day of 10 Strain Probiotic provides some of the good bacteria beneficial for essential, everyday body functions.*
