

ADVANCED DIGESTIVE PROBIOTIC

Product Overview

- One capsule each day maintains a healthy digestive system!*

Poor diet, age, stress, travel, antibiotics and other prescription medications can enable bad bacteria to flourish in the digestion system. They can tip the healthy balance of the good-versus-bad bacteria which may leave us vulnerable to digestive upsets. Probiotics are the good or "friendly" bacteria that can help restore balance to our digestive and immune systems.¹

- Every package contains 100 blister packed low-moisture vegetarian capsules.
- Each daily probiotic serving provides a minimum of 10 billion live active cultures.†
- Each capsule features a proprietary blend of twelve probiotic strains; clinically proven to support digestive, immune, and overall health.*
- Our formula also contains 50 mg of the prebiotic xylooligosaccharides (XOS). Probiotics are food for the probiotics and thus can help stimulate the growth of beneficial microflora*.

† Each capsule contains a minimum of 10 billion live cultures at time of manufacture.

trunature® Advanced Digestive Probiotic features a 12 strain blend of premium probiotics including *Lactobacillus acidophilus*, *Bifidobacteria lactis*, and *L. rhamnosus* GG strains. These safe and effective premium probiotics have been shown to help defend against occasional constipation, diarrhea, gas, and bloating.^{2,3} They have been scientifically shown to help fight occasional digestive tract illnesses and help support a healthy immune system.^{2,3}

- Individual blister-packed capsules protect against heat, light and moisture. They determine when the last dosage was taken, encourage compliance and decrease accidental misuse.
- Low moisture capsules, derived from vegetable sources, protect and can help extend the shelf life of the product.
- No refrigeration necessary, convenient for traveling and enjoying an active lifestyle.

The trunature® Advanced Digestive Probiotic Features
