

PROLAB® Amino Gel-Caps delivers a complete spectrum of essential and non-essential amino acids. Amino Acids are the building blocks of muscle and are not only essential to build, protect and maintain lean muscle tissue, they also help to regulate hormones, create antibodies, and even DNA itself. Although amino acids are obtained from whole foods, the higher nutritional demands of an athlete may require increased support. Supplemental intake of amino acids from **PROLAB Amino Gel-Caps** supplies the body with a steady flow of these indispensable compounds. **PROLAB Amino Gel-Caps** were formulated without fillers or binders in a gel-cap that readily dissolves to deliver high quality nutrients.†* You do your part.
