

Ultra Potent-C® 500 is a proprietary, patented vitamin C formula that features a unique blend of metabolites designed to enhance the utilization of the preparation. Its buffered delivery system is designed to help prevent the potential stomach upset that is sometimes associated with high vitamin C intake. Ultra Potent-C 500 supports immune function by helping promote natural killer cell and white blood cell activity. Preliminary scientific research suggests that vitamin C in the form of Ultra Potent-C® may result in improved uptake of the vitamin by white blood cells when compared to regular ascorbic acid.*
