patented (Patent # US 8,117,044 and 8,116,842)

nano-nutrient processing technology

Fat soluble nutrients like CoQ10 tend to bunch together in the intestine, making them difficult to absorb. Using nano encapsulation prevents molecules from clinging together, enhancing absorbability.

Carotenoids are some of the harder to absorb antioxidants, but with SCS certification you can be ensured your body is utilizing the comprehensive carotenoid blend provided in LifePak Nano.

LifePak® Nano conforms to the current USP requirements for disintegration for oil and water-soluble vitamins and minerals.
