**BioRhythm**  
ADVANCED DIETARY SUPPLEMENTS

O<sup>2</sup> POSITIVE

**Directions:** Take one serving (see chart) with 12-16 oz. of water before or during physical activity.

**What is O<sup>2</sup> Positive?** BioRhythm's one of a kind preworkout formula, O<sup>2</sup> Positive, delivers exceptional strength gains, blood pumping muscle fullness, and powerful free radical scavengers without central nervous system stimulation.\*

**Why try O<sup>2</sup> Positive?** If it is strength, size, vascularity or lean mass you are looking for, then read on...This Anabolic Blood Powder sets a new standard for supplement expectations. With properly dosed active ingredients and no proprietary blends, all you get is more results faster.\*

**What is in O<sup>2</sup> Positive?** It is a five part system that targets naturally weak links in the blood to muscle relationship that limit growth, at least until NOW.\*

- **Glyco Positive** acts like a modern superhighway transport system for oxygen, nitric oxide, glycogen fuel and nutrients for instant & sustained strength and endurance.\*
- **Nitro Positive** is a unique nitric oxide system that takes advantage of new metabolic discoveries. By using over five (5) grams of superior 2:1 L-Arginine AKG with Citrulline Malate, massive amounts of the nitric oxide blood gas can be synthesized at variable rates yielding long lasting pumps and vascularity.\*
- **Power Positive** Power Positive combines old school strength with a modern day precision creatine (Mg2+- Creatine Chelate U.S. Patent# 6,114,379). The strength curve spikes when this patented ingredient is used with the supporting amino's and transport system in O<sup>2</sup> Positive.\*
- **Focal Positive** is a key component to achieving the required intensity for growth. Focus and sustained energy levels heighten in minutes and continue to peak through the duration of the most rigorous of training sessions. New and novel concepts within O<sup>2</sup> Positive make this possible without caffeine or stimulants!\*
- **Filter Positive** is an essential component nearly always skipped. Powerful nitric oxide supplements produce catabolic (muscle eating) free radicals. O<sup>2</sup> Positive offers a huge dose of the most powerful free radical scavengers assuring an unimpeded path to growth and repair.\*

Professional Strength for Professional Results
