

Green tea extract has been shown to maintain skin elastin to help minimize the visual signs of aging.* Tēgreen 97® is an exclusive preparation of green tea leaf extract standardized to 97% polyphenols, two thirds of which are catechins (≥95 mg EGCG per capsule). Each capsule is equivalent to the polyphenol content of approximately seven Asian cups of traditionally brewed green tea without the caffeine. The antioxidant-catechins in Tēgreen 97® have been shown to help support the body's antioxidant network in the presence of pollution, stress, and toxins.*

DIRECTIONS FOR USE: As a dietary supplement, take one (1) capsule twice daily with food. Do not exceed 1,200 mg green tea in combination with other green tea-containing supplements. Store in a cool dry place.

WARNING: Keep out of reach of children. Tēgreen 97® is not intended for pregnant or lactating women. If you are taking a prescription medication consult a physician prior to use.
