

D-Aspartic Acid Increases Natural Testosterone Production
DAA accumulates in the testes and may activate the Leydig cells to create more natural testosterone. It may also have action in the central brain region and activate the pituitary gland to initiate more natural hormone production.

What Can DAA Do For You?

- **BOOST NATURAL TESTOSTERONE LEVELS WHICH CAN LEAD TO A LEANER, MORE MUSCULAR LOOK**
- **INCREASE MUSCLE STRENGTH AND ENERGY LEVELS**
- **IMPROVE RECOVERY TIME**
- **SUPPORT GROWTH HORMONE LEVELS**

Increase Testosterone Levels

Testosterone has a positive effect on strength, stamina, lean muscle retention, and fat loss. Increased testosterone levels have a dramatic impact on metabolism and fat loss, resulting in a leaner physique.
