

Black Tea

Dietary Supplement

Black teas are fully fermented teas where, during the process, the oxygen causes the leaves to turn from green to near black. Ideal for people with sensitive stomachs. Though some antioxidants are lost during fermentation, black teas still maintain significant antioxidant profiles and have been enjoyed for their rich, robust flavor.*

Flavor — Smooth, earthy, full and well-rounded flavor that traverses softly across the palate

Directions: Add the amount of botanicals per a recipe, as desired, or as directed by a health practitioner. The proper way of extracting botanicals depends on parts used. Flowers, fruits and leaves can usually be *steeped* or *decocted* (boiling over fire) while stems, barks and roots typically require *decocting*.

In a *Desktop Botanical Garden™ Glass Tea & Elixir Maker*, add 1 part botanical(s) and 5-8 parts water, steep or decoct for 5-20 minutes. You can boil water directly in the *Elixir Maker*. Repeat this process for 2nd or 3rd extraction until all active constituents have been extracted.
