He Shou Wu is an elite healthy-aging tonic herb. It is traditionally used to support the liver, kidneys, brain and sexual organs. Dragon Herbs uses only fully mature He Shou Wu rhizomes that have grown in the ground for 7-8 years before harvesting (compare to the 1-year-old average on the American market). The roots are prepared by slow cooking in a black bean soup for over 36 hours, surpassing ancient and modern preparation requirements. The Dragon Herbs advanced extraction process results in a rich, full-spectrum elixir that may be used throughout one's lifetime.*
