Deer Placenta

A New Lease On Life

鹿胎盤

Dietary Supplement

60 Capsules • 500 mg per capsule

In Chinese Herbalism, *Jing* is the primal energy of life. We are given a certain amount of *Jing* by our parents at birth, the *prenatal Jing*. We deplete our *Jing* through our living. When we run low on *Jing* we show the signs of aging, and when we run out of *Jing* we die. Most plant-based Jing herbs can only replenish *postnatal Jing*. The unique biological compounds in placenta are responsible for the initiation and nurturing of new lives. Placenta is traditionally thought to be the **most potent substance that can replenish prenatal Jing**. Deer placenta closely resembles human placenta chemically and is traditionally used for rejuvenating the body. It is as close as one can get to re-birth. Deer is considered to be a "higher order" animal in Chinese Herbalism.*
