Dragon Herbs Wild Siberian Chaga™ is the full spectrum extract of Chaga (*Inonotus obliquus*), the slow growing woody mushroom that grows naturally on birch trees in Siberia. Fully mature Chaga is collected wild from remote, pristine forests in sub-arctic Siberia, the premier Di Tao (authentic) source in the world for Chaga. This Chaga is rich in active polysaccharides, melanin, phenolic compounds and lanostane-type triterpenoids. It is a powerful antioxidant. The Chaga is extracted using ultra-modern technology to preserve the complete active constituent profile.*
