Benfotiamine is a lipid-soluble derivative of vitamin B₁ (thiamin) with high bioavailability. It is better absorbed than water-soluble forms of thiamin and has an estimated bioavailability of up to 3.6 times as high as compared to thiamin hydrochloride, making benfotiamine especially useful for people with absorption difficulties.

Do not use if shrinkwrap is broken or missing. Store in a cool, dry place (59°F-85°F) away from direct light.

Produced under a strict quality management system in compliance with Good Manufacturing Practices (GMPs) and third-party quality certifications.
