

Willow bark has been used throughout the centuries and today for the treatment of pain (particularly low back pain from overexertion), headache, and inflammatory conditions.* The bark of white willow contains salicin, which is a chemical similar to aspirin. In combination with the herb's powerful anti-inflammatory plant compounds (called flavonoids), salicin is thought to be responsible for the pain-relieving and anti-inflammatory effects of the herb.*

SUGGESTED USE: As a dietary supplement, adults take one (1) capsule 1 to 2 times daily, preferably with a meal or as directed by a health care professional.

CAUTION: If you are pregnant, nursing, taking any medication(s) or have any medical condition, consult your doctor before use. Discontinue use and consult your doctor if any adverse reactions occur. Not intended for use by persons under the age of 18.
