

Echinacea is a North American coneflower known for its antibiotic and healing properties. It supports immune system function by stimulating the production of T-cell.* Echinacea may also help to reduce inflammation in arthritis and inflammatory skin conditions.* It has been used to aid in healing everything from sunburns to common cold.*

SUGGESTED USE: As a dietary supplement, adults take one (1) capsule three to six times daily, preferably with meals. (Capsules may be opened and prepared as tea).

WARNING: If you are pregnant, nursing, taking any medication, planning any medical procedure or have any medical condition, consult your doctor before use. Discontinue use and consult your doctor if any adverse reactions occur.
