

Suggested Usage: Take 3 capsules before any meal containing complex carbohydrates or starches, or as directed by a healthcare practitioner.

PHASE 2® is a non-stimulant white kidney bean extract that can help to delay the breakdown of dietary starches by limiting the action of the digestive enzyme alpha-amylase.* By lowering the activity of this enzyme, the absorption and utilization of carbohydrates from starch may also be reduced.* Studies have shown that, when used to supplement weight loss programs that include a sensible diet and exercise program, PHASE 2® may help you achieve your weight management goals.*

These statements have not been evaluated by the Food and Drug Administration. This product is not intended to diagnose, treat, cure or prevent any disease.

Caution: For adults only. Consult physician if pregnant/nursing, taking medication, or have a medical condition (especially diabetes or hypoglycemia). Keep out of reach of children.
