

Suggested Use: Take 1 Softgel daily with a fat-containing meal.

Ubiquinol is the reduced and active free radical quencher form of Coenzyme Q10 (CoQ10).^{*} CoQ10 is found in all cells of the body, with especially high concentrations in the heart, and is essential to mitochondrial energy production and functions as a powerful, fat soluble, free radical scavenger.^{*} These properties make Ubiquinol an ideal supplement for the support of energy production and free radical protection in the heart, vascular structures, brain and neurons.^{*}
