Caution: Consult a physician if you have impaired kidney function or are taking any prescription medications that affect kidney function. Do not exceed recommended dosage.

*These statements have not been evaluated by the FDA. This product is not intended to diagnose, treat, cure or prevent any disease.

D-Ribose is a five carbon sugar that acts as a source of cellular energy for

the synthesis of ATP. Creatine is converted to creatine phosphate in the body, helping to fuel skeletal muscles and providing support for immediate energy production during high-intensity workouts. Creatine and Ribose have been shown to support healthy blood flow and mental acuity, while Creatine supports muscular endurance and strength especially during periods of intense exercise and training. Creatine is also beneficial in stimulating cells necessary for muscular growth during training while Ribose aids in the removal of free radicals from the body. Both D-Ribose and Creatine are naturally occurring substances in the body, that jointly aid in optimizing results.*

SUGGESTED USAGE: As a dietary supplement, mix 2 ½ level teaspoons in juice or water 2 to 3 times daily, preferably before and after exercise. Consider taking this product in combination with NOW® Pyruvate and Carbo Gain.

BIOENERGY
RIBOSE™

Net Wt. 315 g (11.11 oz)

Ribose Energy with Creatine

100% Pure Powder

- Maximizes ATP Production
- Supports Muscular Endurance*
