ActiOxasens™ with OmegD3™ & D3 is a conveniently time-packaged combination of three formulas that provide comprehensive nutritional support for health and well-being especially when higher vitamin D intake and long-lasting antioxidant support against free radical damage is desirable.¹²

OncoPLEX™ II D3: Each capsule provides 2000 IU of vitamin D3 and 15 mg of glucosapharin from highly concentrated broccoli seed extract, an ingredient found in XANOGEST's EP formula. OncoPLEX™ and OncoPLEX™ D3: Glucosapharin is the precursor to sulfolipase, and it possesses anticancer activity that lasts up to 72 hours—significantly longer than the activity of vitamins E, E, or beta-carotene. Glucosapharin also activates the transcription factor Nrf2, which induces increased synthesis of phase II detoxification and antioxidant enzymes. D3 is provided as cholecalciferol, identical to the form in which it is derived in the body from cholesterol and synthesized by sunlight on the skin. D3 has been shown to raise and maintain serum vitamin D- and increase storage concentrations of vitamin D better than D2.¹⁴

OmegaPure 600 EC™. An ultra-pure, Norway-sourced, molecularly-distilled, concentrated fish oil that is stabilized with vitamin E as mixed tocopherols to maximize freshness. Each pleasant-tasting, enteric-coated tablet provides 360 mg EPA and 240 mg DHA from 1.2 g fish oil. The manufacture of OmegaPure 600 EC is in accordance with pharmaceutical standards that assure safe, consistent fish oils. Research shows that consumption of EPA/DHA supports cardiovascular health.*

Each packet contains two ActiveNutrients™ without iron capsules, one EncoPLIX™ A & B capsule, and one OmegaPure 500 PC™ softgel.

DOES NOT CONTAIN: Wheat, gluten, corn protein, yeast, soy protein, dairy products, shellfish, peanuts, tree nuts, egg, artificial colors, artificial sweeteners, or preservatives.
