

MorDHA® is a premium Omega-3 supplement utilizing supercritical CO₂ extraction technology that delivers 465mg of DHA nutrition in a convenient, once daily serving. A woman's demand for DHA increases during pregnancy and DHA taken during lactation enhances the quality of breast milk.[†] DHA is also essential for the proper development of infants and children.[†]

Cold processed. Smart choice.

Supercritical CO₂ extraction utilizes 400% less heat than the leading brands—the typical process can expose heat-sensitive oils to temperatures as high as 400° F. Liquid CO₂, an organic compound, takes the place of typically-used harsh chemical solvents.

Minami also offers one of the highest concentrated Omega-3 fish oils on the market, which means more Omega-3 nutrition, no fillers and fewer softgels to take—now that is smart.
