"The quality, therapeutic concentration, and affordability of a nutritional product can, and often does, mean the difference between lethargy and energy, sickness and health, and, quite literally, life and death. I don't want anyone to be tired, sick or dead because they could not obtain or afford the best possible product. If someone does not feel this same way, they should not be in the nutritional product business. I live and breathe this philosophy in both my personal and professional life and constantly strive to evolve HealthForce products and offer them at the best possible values. I would rather die than compromise these principles"
