†Percent Daily Value based on a 2,000 calorie diet.

*Daily Value not established.

Other Ingredients: Vegetable Cellulose Capsule, Cellulose, Magnesium Stearate and Silica.

Discussion: KAL® Colostrum Lactoferrin is sourced from 100% pure New Zealand colostrum. The colostrum is obtained from the cow within 48 hours of calving and processed in New Zealand under a fully implemented HACCP (Hazard Analysis Critical Control Point) program. BSE (Bovine Spongiform Encephalopathy) is not known to exist in New Zealand. Each capsule provides 200mg Immunoglobulins, which includes all four of the key immunoglobulins: IgG, IgM, IgA and secretory IgA. Lactoferrin is added to provide nutritive support for immune function and to act as a free radical scavenger in the body. This powerful combination, enhanced with Beta Glucan, is intended to provide nutritive support for general health and well-being.
