

HEALTHY ANTIOXIDANT ESTROGEN BALANCE

100MG OF DIM

PROMOTE HORMONE BALANCE

- Diindolylmethane (DIM) is a natural compound found in cruciferous vegetables such as broccoli, brussels sprouts, cabbage and kale. In clinical studies, DIM has been shown to balance hormone levels in both men and women by activating enzymes that breakdown excess estrogen, while also converting more potent forms of estrogen into less potent forms, reducing the overall effects of estrogen in the body.

GREENS ANTIOXIDANT

- DIM is a powerful antioxidant, which can reduce damage caused by free radicals throughout the body. DIM is one of the many phytonutrients that give cruciferous vegetables such as broccoli their nutritional renown.

For Best Results: Combine with Nutrakey's DHEA for optimal endocrine support.
